

STORY REGISTER USER

As a user

I want to register

so that I'll be able to use the application

WIREFRAMES:

ACCEPTANCE CRITERIA:

- From the Login page, I should be able to navigate to a sign up form
- A user can enter a name, first name, email address and password
- All fields are mandatory
- If a mandatory field is not filled in or a field contains invalid information, the form is shown again with an error message (server side validation). Correct fields stay filled in. It is not necessary to mark invalid fields by a colour.
- - After the form is submitted, the home page is shown
